

Home router support

We are more than happy to help you with basic home router setups. During a new install at no additional charge, if you have a router that we are familiar with we can setup your wireless SSID, Wi-Fi password and check that your devices have internet service. If you do not have a router or if the router does not meet our performance standards, we can install and setup a new router at no additional labor charge. We stock ASUS Dual Band Wireless Router Model #RT-ACRH13 for \$95.00 plus tax. **Please know for safety reasons, while we are working on your wireless equipment, we will be wearing a custom aluminum foil hat. **

SDWISP Customer Services Call

We charge \$60.00 for the first 30 minutes and \$30.00 for each additional 15 minutes; i.e. we are \$120.00 an hour. We give a 30-day warranty on any service that we perform. Hardware warranties are with the manufacturer so please register your product with the manufacturer for their warranty.

Hardware that will cause interference with your internet service!

Please view sharing the 5 Gig band on the support page.
